### PROFILE

Experimental software engineering professional who is passionate about building scalable and efficient business solutions, I specialize in developing and optimizing applications using Microsoft Power Platform, SharePoint, UX design skills and C#. With a strong background in software engineering, I thrive in designing application and automation solutions, streamlining workflows, and enhancing collaboration through cloud-based technologies.

### WORK EXPERIENCE

- NTT Data, MEA

2020 - PRESENT

Software Applications Engineer

  - Over the past 5 years, I played a key role in designing, developing, and optimizing enterprise solutions for both local and international clients. My responsibilities spanned across Power Platform application development, process automation, system integrations, client support and cloud migrations, ensuring seamless digital transformation and operational efficiency.
- Dimension Data

2019 - 2021

Software Engineer Intern

  - This role marked my first professional contract, providing me with invaluable hands-on Software Engineering experience. Working in small teams of graduates, we collaborated to solve real-world business challenges, explored emerging technologies, and shared knowledge in a dynamic, growth-driven environment.
- KM Digital

2014 - 2016

Creative Graphic Designer

  - Engaged with clients to understand their design and branding needs, documented these requirements in job cards, and streamlined the artwork process from design to print.
  - My design skills include proficiency in Corel Draw, Photoshop, Illustrator, and Adobe XD.

### EDUCATION

- SOFTWARE ENGINEERING

2018 - 2020

Johannesburg | WeThinkCode Institution
- IT TECHNICAL SUPPORT

2012 - 2013

Johannesburg | MICSETA NQF 5
- MATRIC

2009

Johannesburg | Illinge High School
